

BIRDS AND BEASTS FROM YELLOWSTONE TO THE EAST!

Andy & Beth Greenwood will take you on a digital journey that includes images and stories of Elk in rut, birds, surprising mammals and stunning scenery from Yellowstone and Grand Teton National Parks.

The journey continues through North and South Dakota which includes National and State Parks including visits with wild horses and huge prairie dog towns.

Next, they venture to the deep south - Louisiana, Mississippi and North Eastern Texas with images of wintering birds, plantations and haunting swamps.

Then it's on to Florida for birds in breeding plumage and display, followed by a return home with incredibly beautiful new images of New Hampshire's birds and animals.
